

Submission Worksheet

Submission Data

Course: IT202-450-M2025

Assignment: IT202 PHP Problems

Student: Matt T. (mt85)

Status: Submitted | **Worksheet Progress:** 100+%

Potential Grade: 11.00/10.00 (110.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 6/1/2025 9:09:04 PM

Updated: 6/1/2025 9:19:02 PM

Grading Link: <https://learn.ethereallab.app/assignment/v3/IT202-450-M2025/it202-php-problems/grading/mt85>

View Link: <https://learn.ethereallab.app/assignment/v3/IT202-450-M2025/it202-php-problems/view/mt85>

Instructions

1. Ensure you read all instructions and objectives before starting.
2. Create a new branch from dev called M2-Homework
 1. `git checkout dev` (ensure proper starting branch)
 2. `git pull origin dev` (ensure history is up to date)
 3. `git checkout -b M2-Homework` (create and switch to branch)
3. Copy the template code from here: [GitHub Repository - M2 Homework](#)
 - It includes Problems 1-4 and `base.php`. Put all into an M2 folder or similar inside your `public_html`
 - Immediately record to history
 - `git add public_html`
 - `git commit -m "adding M2 HW baseline files"`
 - `git push origin M2-Homework`
 - Create a Pull Request from M2-Homework to dev and keep it open
4. Fill out the below worksheet
 - Each Problem requires the following as you work
 - Ensure there's a comment with your UCID, date, and brief summary of how the problem was solved
 - Initial outline/plan of how you'll solve it via comments (add/commit after this stage)
 - Code solution (add/commit periodically as needed)
5. Once finished, click "Submit and Export"
6. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to Github
 1. `git add .`
 2. `git commit -m "adding PDF"`
 3. `git push origin M2-Homework`
 4. On Github merge the pull request from M2-Homework to dev
 5. On Github create a pull request from dev to prod and immediately merge. (This will trigger the prod deploy to make the heroku prod links work)
7. Upload the same PDF to Canvas
8. Sync Local
 1. `git checkout dev`
 2. `git pull origin dev`

Section #1: (2 pts.) Problem 1 - Odds

Progress: 100%

≡ Task #1 (2 pts.) - Edit the `printOdds` function to output odd values of the array

Progress: 100%

Part 1:

Progress: 100%

Details:

Two screenshots are expected

1. Snippet of relevant code showing solution (with uid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)

```
Running Problem 1 for [m485] [2025-06-02 01:08:48]
// Only make edits between the designated "Start" and "End" comments
printArrayInfo($arr, $arrayNumber);
// Challenge: Print odd values only in a single line separated by commas
// Step 1: sketch out plan using comments (include uid and date)
// Step 2: Add comment your outline of comments (required for full credit)
// Step 3: Add code to solve the problem (uid/comment is needed)

echo "Output Array: [ result here ]";
// Start Solution Path:

// steps 00-01-0025 using below steps to solve the problem
// step 1: sketch through your outline --
// step 2: during each iteration check if the value is odd using
// step 3: keep the output in a single line via ...

// print out your solution path here
echo "[ result here ]";
// End Solution Path:
echo "<br>";
```

Heroku output

```
function printOdds($arr, $arrayNumber)
{
    // Only make edits between the designated "Start" and "End" comments
    printArrayInfo($arr, $arrayNumber);
    // Challenge: Print odd values only in a single line separated by commas
    // Step 1: sketch out plan using comments (include uid and date)
    // Step 2: Add comment your outline of comments (required for full credit)
    // Step 3: Add code to solve the problem (uid/comment is needed)

    echo "Output Array: ";
    // Start Solution Path:

    // steps 00-01-0025 using below steps to solve the problem
    // step 1: sketch through your outline --
    // step 2: during each iteration check if the value is odd using
    // step 3: keep the output in a single line via ...

    // print out your solution path here
    echo "[ result here ]";
    // End Solution Path:
    echo "<br>";
}
```

Section #2: (2 pts.) Problem 2 - Sum

Progress: 100%

Task #1 (2 pts.) - Edit the `sumValues` function to sum the array values and present them in a format with exactly two decimal places

Progress: 100%

Part 1:

Progress: 100%

Details:

Two screenshots are expected

1. Snippet of relevant code showing solution (with uid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)

```
heroku output

function simulate($app, $arrayvalues)
{
    // only make calls between the designated "start" and "end" indexes
    printarrayinfo($app, $arrayvalues);

    // Challenge 1: Sum all the values of the provided array and assign to "total"
    // Challenge 2: Have the sum be represented as a number with exactly 2 decimal places, assign to "modifiedTotal"
    // Example: If should be shown as 8.88, it should be shown as 8.88, etc.
    // Step 1: Sketch out plan using comments (include what and how)
    // Step 2: Add/convert your outline of comments (required for full credit)
    // Step 3: Add code to solve the problem (add/convert as needed)

    $total = 0;
    // Start Solution Logic
    // Solve Challenge 1 here

    // with comments, using steps below to solve
    // Step 1: using    to iterate the array
    // Step 2: sum each value by
    // Step 3: using    to update $total as the output is processed

    $total = 0; // fake example of setting the assume
    // solve challenge 2 here
    $modifiedTotal = "0.00";
    $modifiedTotal = "0.00"; // fake example of setting the assume

    // End Solution Logic
    echo "Reported Raw Value: ($total)/0.00";
    echo "Reported Modified Value: ($modifiedTotal)/0.00";
    echo "
}
```
